

BraunAbility® *Update*

TRANSIT CONNECT LIFTS

A rear door application installation kit for the 2010 Transit Connect is now available.

A kit is offered on two lift series - the Millennium Series and the Century Series.

Please refer to BraunAbility.com or Dealer Depot for lift specifications.

The kits are only offered as a rear application and priced the same; side door entries are too narrow. InterMotive's Universal Interlock will work on the lift, but door operators are not available.
