

Honda Entervan® Features

Entervan® 2011 Honda Odyssey Chassis

See back of this guide for chassis requirements.

Lowered Floor

14" lower than conventional minivans, the floor is lowered from the toe pan to the rear axle and provides a choice of three wheelchair securement positions.

Automatic Door

The OEM Honda power door operator opens the sliding door at the touch of a button.

Automatic Ramp

The lightweight power foldout 50/50 ramp offers unparalleled ease of access for wheelchair and scooter users.

Custom Ground Effects with Integrated Step

Adds stylish lines and enhances smooth OEM appearance.

Automatic Kneeling Rear Suspension

The vehicle features a kneeling system to make boarding even easier. An actuator lowers the rear suspension while the door opens, which reduces the slope of the automatic ramp. The system can be de-activated when desired with the on/off switch.

Integrated Keyfob Remote

Control of the vehicle's accessible features is built into the Honda keyfob remote. Quick-touch operation assures simple, convenient and reliable operation. Two keyfobs are included with the vehicle.

Fold-Down Footrest

Adds comfort for backseat passengers and folds away automatically.

OEM-Style Switches

Operational switches are conveniently located throughout the interior for wheelchair users' convenience. The switches match the OEM style and appearance.

"Step & Roll" Front Passenger Seats

The driver and passenger seats can be easily removed to provide wheelchair securement positions in the front of the vehicle.

Rear Cargo Area

The spare tire is mounted under the rear of vehicle. Third row Flip-and-Fold seats make extra cargo space easy and convenient in just two simple steps.

Wheelchair/Occupant Securement System

One belt system is included for use with the floor-mounted tracks.
